User Story Review

Input User Story:

Parameter Scores (out of 20)

Parameter	Description	Score (out of 20)
Clarity	The story is straightforward but lacks detailed acceptance criteria.	16
Completeness	Preconditions not clearly mentioned.	14
Priority	Priority is not explicitly stated.	10

Improvement Areas:

1. **Add explicit acceptance criteria for prescription error handling:** Consider adding criteria for handling invalid or incomplete prescriptions.
2. **Specify validation rules for dosage and duplicate drugs:** Define specific rules for validating prescription dosages and preventing duplicate prescriptions.
3. **Include system actor details for approval workflow:** Specify the roles and responsibilities of system actors involved in the approval workflow.

Review Summary:

The user story demonstrates a clear understanding of the healthcare domain and the importance of digital prescription approval. However, there are areas for improvement to ensure the story is well-structured, testable, and compliant. By addressing these areas, the story can be further refined to meet the needs of the cross-functional team and ensure a successful implementation.

Recommendations:

- ✓ Review the acceptance criteria to ensure they are comprehensive and cover all possible scenarios.
- ✓ Consider adding preconditions to the story to clarify the context and assumptions.
- ✓ Collaborate with the QA team to ensure that the story is testable and can be easily translated into test cases.
- ✓ Work with the development team to ensure that the technical feasibility of the story is aligned with the project's constraints and requirements.

Action Items:

- ✓ Review and refine the acceptance criteria with the QA team.
- ✓ Add preconditions to the story to clarify the context and assumptions.
- ✓ Collaborate with the development team to ensure technical feasibility.
- ✓ Schedule a follow-up review to ensure the story meets the project's requirements and constraints.

User Story Review

Input User Story:

Review Summary

Parameter | Description | Score (out of 20)

-----|-----|-----

Clarity | The story is straightforward but lacks detailed acceptance criteria. | 16

Completeness | Preconditions not clearly mentioned. | 14

Business Value Alignment | Strong healthcare relevance and compliance focus. | 19

Testability | Can be tested through prescription workflow automation. | 17

Technical Feasibility | Technically feasible with EHR integration. | 18

Overall Score: 84 / 100

Improvement Areas:

1. Add explicit acceptance criteria for prescription error handling.
2. Specify validation rules for dosage and duplicate drugs.
3. Include system actor details for approval workflow.
